

# PMG GROUP OS

## Complete Testing & Verification Checklist v2

Based on Blueprint v2 + v3 | 6 Sections · 32 Agents · 3 AI Modes · 250+ Test Items

Login:  
shershah\_nawabi@pmgggroup-llc.com / PMGAdmin2024!

Status:  
PASS = Works as expected | PARTIAL = Cosmetic issues | FAIL = Broken/missing | N/A = Not applicable  
Test each item in all 3 AI modes: AI Autonomous, Hybrid, Human Controlled

### SECTION 0: LOGIN & AUTHENTICATION

| #    | Test                                     | Expected Result                                    | Status |
|------|------------------------------------------|----------------------------------------------------|--------|
| 0.1  | Navigate to app root URL                 | Login page loads without errors                    |        |
| 0.2  | Login page shows email + password fields | Both input fields visible and accessible           |        |
| 0.3  | Login page has PMG branding              | Logo or "PMG Group" text visible on login          |        |
| 0.4  | Submit empty login form                  | Validation error shown, no crash                   |        |
| 0.5  | Submit wrong email                       | Error toast or inline error shown                  |        |
| 0.6  | Submit wrong password                    | Error toast or inline error shown                  |        |
| 0.7  | Login with valid credentials             | Redirects to Dashboard (Command Center)            |        |
| 0.8  | Session persists on page refresh         | After login, refreshing does not redirect to login |        |
| 0.9  | Logout button in sidebar                 | Clicking logs out and redirects to login           |        |
| 0.10 | Unauthorized API call (logged out)       | Returns 401, redirects to login                    |        |

### SECTION 1: GLOBAL LAYOUT & NAVIGATION

#### 1A: Sidebar Navigation

| #    | Test                               | Expected Result                                                                                   | Status |
|------|------------------------------------|---------------------------------------------------------------------------------------------------|--------|
| 1.1  | Sidebar renders after login        | Sidebar visible on left side                                                                      |        |
| 1.2  | Sidebar shows Dashboard link       | "Command Center" with LayoutDashboard icon                                                        |        |
| 1.3  | Sidebar shows 6 main sections      | Outreach, CRM, Marketing, Production, Admin, Finance                                              |        |
| 1.4  | Sidebar shows Settings link        | Settings gear icon at bottom                                                                      |        |
| 1.5  | Sidebar section grouping labels    | "Revenue Engine" (Outreach, CRM), "Growth" (Marketing, Production), "Operations" (Admin, Finance) |        |
| 1.6  | Sidebar collapse/expand toggle     | Chevron button collapses sidebar to icon-only mode                                                |        |
| 1.7  | Collapsed sidebar shows icons only | Section labels hidden, only icons visible                                                         |        |
| 1.8  | Active page highlighted in sidebar | Current page link has distinct styling (border, background)                                       |        |
| 1.9  | Click each sidebar link            | Each navigates to correct page without error                                                      |        |
| 1.10 | Sidebar mobile behavior            | On small screens, sidebar becomes hamburger menu (Sheet)                                          |        |
| 1.11 | Mobile sidebar opens/closes        | Sheet opens on hamburger click, closes on selection                                               |        |
| 1.12 | Logout button visible in sidebar   | LogOut icon + "Logout" text at bottom of sidebar                                                  |        |

#### 1B: Top Header Bar

| #    | Test                          | Expected Result                                       | Status |
|------|-------------------------------|-------------------------------------------------------|--------|
| 1.13 | Global Search bar visible     | Search input with icon in top header                  |        |
| 1.14 | Global Search opens overlay   | Clicking search opens search results overlay          |        |
| 1.15 | Global Search returns results | Typing a query returns matching items across sections |        |
| 1.16 | Notification Bell visible     | Bell icon with unread count badge                     |        |
| 1.17 | Notification Bell dropdown    | Clicking shows dropdown with recent notifications     |        |

|      |                                |                                                         |  |
|------|--------------------------------|---------------------------------------------------------|--|
| 1.18 | Notification items display     | Each notification shows title, description, timestamp   |  |
| 1.19 | "Mark as Read" on notification | Individual notification can be marked read              |  |
| 1.20 | "Mark All Read" button         | Clears all unread notification badges                   |  |
| 1.21 | Unread count updates           | Badge count decreases when notifications are read       |  |
| 1.22 | Wallet Display visible         | Shows current wallet balance in header                  |  |
| 1.23 | Wallet balance value           | Shows dollar amount (e.g., \$355.02 or \$360.29)        |  |
| 1.24 | AI Mode Toggle visible         | Mode indicator in header with current mode label        |  |
| 1.25 | AI Mode Toggle clickable       | Clicking opens mode selection dropdown/dialog           |  |
| 1.26 | AI Mode switch from header     | Can switch between AI Auto / Hybrid / Human from header |  |

### 1C: Help Guide System

| #    | Test                             | Expected Result                                                                | Status |
|------|----------------------------------|--------------------------------------------------------------------------------|--------|
| 1.27 | [?] button visible per section   | Help/guide button shown near each sidebar section                              |        |
| 1.28 | Clicking [?] opens guide overlay | Card slideshow overlay opens with steps                                        |        |
| 1.29 | Guide overlay shows step content | Each step: heading, description, visual mockup                                 |        |
| 1.30 | Guide step navigation            | Can navigate forward/backward through steps with Previous/Next                 |        |
| 1.31 | Guide mode-aware tips            | Colored tip box at bottom changes based on current AI mode                     |        |
| 1.32 | Guide close button               | X button or "Done" on last step closes overlay                                 |        |
| 1.33 | Guide content matches section    | Outreach guide shows outreach steps, CRM shows CRM steps, etc.                 |        |
| 1.34 | Guide available for all sections | Outreach, CRM, Marketing, Production, Admin, Finance, Settings all have guides |        |

### 1D: Mode Indicator Banner

| #    | Test                                             | Expected Result                                          | Status |
|------|--------------------------------------------------|----------------------------------------------------------|--------|
| 1.35 | AI Autonomous mode — no banner or crimson banner | No mode restriction banner (AI handles everything)       |        |
| 1.36 | Hybrid mode — yellow/blue banner                 | Banner indicates "Hybrid Mode — AI prepares, you review" |        |
| 1.37 | Human mode — blue banner                         | Banner indicates "Manual Control — AI standby"           |        |
| 1.38 | Banner visible on every page                     | Mode banner appears on Dashboard, Outreach, CRM, etc.    |        |
| 1.39 | Banner disappears when switching to Auto         | Switching to AI Autonomous removes banner or changes it  |        |

## SECTION 2: DASHBOARD (Command Center)

| #    | Test                           | Expected Result                                                         | Status |
|------|--------------------------------|-------------------------------------------------------------------------|--------|
| 2.1  | Dashboard loads without errors | No console errors, no blank screen                                      |        |
| 2.2  | Page title "Command Center"    | Header shows "Command Center" with subtitle                             |        |
| 2.3  | Mode badge in header           | Shows current AI mode (AI Autonomous / Hybrid / Manual)                 |        |
| 2.4  | KPI Card: Total Leads          | Shows count of leads from API                                           |        |
| 2.5  | KPI Card: Qualified            | Shows count of qualified leads                                          |        |
| 2.6  | KPI Card: Active Deals         | Shows active (non-closed) opportunities                                 |        |
| 2.7  | KPI Card: Won Deals            | Shows closed_won opportunity count                                      |        |
| 2.8  | KPI Card: Revenue              | Shows total revenue from won deals (formatted \$Xk)                     |        |
| 2.9  | KPI Card: Pending Tasks        | Shows incomplete task count                                             |        |
| 2.10 | Quick Actions section visible  | Shows 4 action buttons in grid                                          |        |
| 2.11 | Quick Actions — AI Auto mode   | "Find Prospects", "View Pipeline", "Create Content", "Open Settings"    |        |
| 2.12 | Quick Actions — Human mode     | "Enter Prospects Manually" replaces "Find Prospects"                    |        |
| 2.13 | Quick Action clicks navigate   | Each button links to correct page (outreach, crm, production, settings) |        |
| 2.14 | Quick Actions hover animation  | Cards scale on hover (framer-motion)                                    |        |
| 2.15 | Pipeline Summary card          | Shows pipeline stage breakdown with progress bars                       |        |

|      |                                      |                                                                              |  |
|------|--------------------------------------|------------------------------------------------------------------------------|--|
| 2.16 | Pipeline stages listed               | New Lead, Meeting Set, Discovery, Proposal, Negotiation, Won                 |  |
| 2.17 | Pipeline bar widths                  | Bar widths proportional to deal count per stage                              |  |
| 2.18 | Pipeline animated bars               | Bars animate in on load (framer-motion)                                      |  |
| 2.19 | Top 3 deals shown                    | Up to 3 deals listed below pipeline bars                                     |  |
| 2.20 | Deal cards show name + stage + value | Each deal card: title, stage label, dollar amount                            |  |
| 2.21 | Deal cards clickable                 | Clicking a deal navigates to /crm                                            |  |
| 2.22 | Deal mode badges — AI Auto           | "Auto-Advanced" badge on deals                                               |  |
| 2.23 | Deal mode badges — Hybrid            | "Review Required" badge                                                      |  |
| 2.24 | Deal mode badges — Human             | Stage name as badge                                                          |  |
| 2.25 | "View All" link to CRM               | Pipeline card has "View All" button linking to /crm                          |  |
| 2.26 | Empty pipeline state                 | If no deals: "No deals in pipeline yet" message + "Start Prospecting" button |  |
| 2.27 | Recent Leads card                    | Shows up to 5 recent leads                                                   |  |
| 2.28 | Lead items show name + company       | Each lead: first/last name, company name                                     |  |
| 2.29 | Lead mode badges — AI Auto           | "AI Routed" badge on leads                                                   |  |
| 2.30 | Lead mode badges — Hybrid            | "Needs Review" or "Reviewed" badge                                           |  |
| 2.31 | Lead mode badges — Human             | Status name as badge                                                         |  |
| 2.32 | Lead AI annotation — AI Auto         | "All leads auto-scored and routed by AI" text                                |  |
| 2.33 | Lead AI annotation — Hybrid          | "AI scored — your approval needed" text                                      |  |
| 2.34 | Lead AI annotation — Human           | "Manual tracking — no AI processing" text                                    |  |
| 2.35 | Lead items clickable                 | Clicking leads navigates to /outreach                                        |  |
| 2.36 | "View All" link to Outreach          | Recent Leads has "View All" button linking to /outreach                      |  |
| 2.37 | Empty leads state                    | If no leads: "No leads yet — start with Outreach" message                    |  |
| 2.38 | System Status card                   | Shows 6 module status indicators                                             |  |
| 2.39 | System modules listed                | AI Engine, Wallet, Outreach, CRM, Marketing, Production                      |  |
| 2.40 | Module status dots                   | Green (active), pulsing (autonomous/hybrid), yellow (standby)                |  |
| 2.41 | Module status detail text — AI Auto  | AI-specific descriptions (e.g., "Full auto — all agents active")             |  |
| 2.42 | Module status detail text — Hybrid   | Hybrid descriptions (e.g., "AI + human review")                              |  |
| 2.43 | Module status detail text — Human    | Manual descriptions (e.g., "Manual only — AI standby")                       |  |
| 2.44 | Dashboard responsive layout          | Cards reflow on smaller screens (grid cols reduce)                           |  |

## SECTION 3: OUTREACH (6 Tabs / 6 Agents)

### 3A: Tab Navigation

| #   | Test                 | Expected Result                                                           | Status |
|-----|----------------------|---------------------------------------------------------------------------|--------|
| 3.1 | Outreach page loads  | No errors, tab bar visible                                                |        |
| 3.2 | 6 tabs visible       | Prospect Finder, Social Command, Strategy, Compose, Follow-ups, Analytics |        |
| 3.3 | Default tab selected | Prospect Finder selected on load                                          |        |
| 3.4 | Clicking each tab    | Content switches without errors                                           |        |
| 3.5 | Active tab styling   | Selected tab has distinct border/highlight                                |        |
| 3.6 | Tab animation        | Content fades/slides in on tab switch (framer-motion)                     |        |

### 3B: Prospect Finder (Agent 1)

| #   | Test                                             | Expected Result                                                  | Status |
|-----|--------------------------------------------------|------------------------------------------------------------------|--------|
| 3.7 | "Find Prospects" button visible (AI Auto/Hybrid) | AI button shown when not in Human mode                           |        |
| 3.8 | "Find Prospects" button hidden (Human)           | Button hidden or replaced in Human mode                          |        |
| 3.9 | Click "Find Prospects"                           | Loading state !' toast with results (or fallback toast on error) |        |

|      |                                     |                                                               |  |
|------|-------------------------------------|---------------------------------------------------------------|--|
| 3.10 | Prospect cards display              | Each card: company name, fit score, accessibility score       |  |

| 10.3 | Switch to Human via Settings         | All pages reflect Human mode                 |        |
| 10.4 | Switch via header toggle             | Mode changes immediately across app          |        |
| 10.5 | Mode persists on page navigation     | Switching pages retains current mode         |        |
| 10.6 | Mode persists on page refresh        | Refreshing browser retains mode (API-backed) |        |

10B: AI Autonomous Verification

| #     | Test                                 | Expected Result                                               | Status |
|-------|--------------------------------------|---------------------------------------------------------------|--------|
| 10.7  | Dashboard — no restriction banner    | No "human controlled" or "hybrid" banner                      |        |
| 10.8  | All AI buttons visible               | Find Prospects, Generate Leads, Auto-Assign, etc. all showing |        |
| 10.9  | Bot icons visible                    | AI automation badges and icons shown                          |        |
| 10.10 | "AI Routed" / "Auto-Advanced" badges | Leads and deals show AI processing badges                     |        |

10C: Hybrid Mode Verification

| #     | Test                                      | Expected Result                             | Status |
|-------|-------------------------------------------|---------------------------------------------|--------|
| 10.11 | Banner indicates Hybrid mode              | Yellow/blue banner on pages                 |        |
| 10.12 | AI buttons still visible                  | All AI action buttons accessible            |        |
| 10.13 | "Needs Review" / "Review Required" badges | Items show review-needed status             |        |
| 10.14 | Human approval indicators                 | Some items marked as needing human sign-off |        |

10D: Human Controlled Verification

| #     | Test                                    | Expected Result                                                                                                                                                            | Status |
|-------|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| 10.15 | Banner indicates Manual Control         | Blue banner on pages                                                                                                                                                       |        |
| 10.16 | AI automation buttons HIDDEN            | Find Prospects, Generate Leads, AI Build Funnel, Auto-Assign, Auto-Generate Monthly, Draft Contract, Scan for Updates, Auto-Update, Generate Morning Briefing — all hidden |        |
| 10.17 | Manual alternatives available           | "Enter Prospects Manually" instead of "Find Prospects"                                                                                                                     |        |
| 10.18 | Context-specific AI helpers also hidden | Generate Fix Plan, Auto-Fix Quality — hidden                                                                                                                               |        |
| 10.19 | View/Read-only features still work      | Viewing invoices, documents, contracts still available                                                                                                                     |        |
| 10.20 | Manual action buttons still work        | "Mark Complete", "View", "Download" still clickable                                                                                                                        |        |

SECTION 11: WALLET & BUDGET SYSTEM

| #    | Test                                      | Expected Result                                      | Status |
|------|-------------------------------------------|------------------------------------------------------|--------|
| 11.1 | Wallet balance in header                  | Shows dollar amount at all times                     |        |
| 11.2 | Wallet balance stays static in dummy mode | Balance doesn't actually deduct                      |        |
| 11.3 | Wallet display across all pages           | Visible on Dashboard, Outreach, CRM, Marketing, etc. |        |

|      |                              |                                         |  |
|------|------------------------------|-----------------------------------------|--|
| 11.4 | Wallet tab in Settings       | Full wallet breakdown accessible        |  |
| 11.5 | Budget pool visualization    | 4 pools with progress bars              |  |
| 11.6 | Spending controls functional | Auto-pause toggle, threshold input work |  |
| 11.7 | Transaction history          | Past wallet transactions viewable       |  |

SECTION 12: BUTTON-TO-BUTTON FLOW (E2E Chains)

| #    | Test                               | Expected Result                                                                              | Status |
|------|------------------------------------|----------------------------------------------------------------------------------------------|--------|
| 12.1 | Outreach full chain                | Find Prospects ! Plan ! Draft ! Send ! Follow-up ! Move to CRM — all produce toasts          |        |
| 12.2 | CRM full chain                     | Lead ! Score ! Meeting ! Prep Call ! Transcript ! Proposal ! Send ! Won — all produce toasts |        |
| 12.3 | Production full chain              | Won ! Onboarding ! Audit ! Create ! Quality Review ! Publish — all produce toasts            |        |
| 12.4 | Finance chain                      | Create Invoice ! Send ! Track Payment ! Revenue Dashboard — all produce toasts               |        |
| 12.5 | Admin chain                        | Generate Briefing ! Go to action ! Complete Task — all produce toasts                        |        |
| 12.6 | No dead-end buttons                | Every button leads to a next action, toast, or clear result                                  |        |
| 12.7 | No "undefined" or "null" in toasts | All toast messages show meaningful content                                                   |        |
| 12.8 | No blank/empty toast messages      | Every toast has title and description                                                        |        |

SECTION 13: CONTENT & TERMINOLOGY STANDARDS

| #     | Test                              | Expected Result                                                                           | Status |
|-------|-----------------------------------|-------------------------------------------------------------------------------------------|--------|
| 13.1  | No "leverage" in any UI text      | Word not present in static or generated text                                              |        |
| 13.2  | No "synergy" in any UI text       | Word not present                                                                          |        |
| 13.3  | No "cutting-edge" in any UI text  | Word not present                                                                          |        |
| 13.4  | No "game-changing" in any UI text | Word not present                                                                          |        |
| 13.5  | No "innovative" in any UI text    | Word not present                                                                          |        |
| 13.6  | NIST referenced correctly         | Used in industry context                                                                  |        |
| 13.7  | SOC 2 referenced correctly        | Used in compliance context                                                                |        |
| 13.8  | SIEM, EDR, MDR, XDR terminology   | Used naturally in cybersecurity context                                                   |        |
| 13.9  | Pricing tiers consistent          | Starter \$2,500 / Growth \$5,000 / Enterprise \$10,000 everywhere                         |        |
| 13.10 | Sample client names consistent    | SecureNet Solutions, CyberShield IT, DataVault MSP, Fortress Cybersecurity, ShieldOps Inc |        |
| 13.11 | "20 deals" promise visible        | Core guarantee referenced in Production/Reporting                                         |        |
| 13.12 | Human tone in all content         | No AI-sounding fluff in any text                                                          |        |

SECTION 14: ERROR HANDLING & EDGE CASES

14A: API Error Handling

| #    | Test                          | Expected Result                                 | Status |
|------|-------------------------------|-------------------------------------------------|--------|
| 14.1 | AI call with 403 response     | Falls back to hardcoded toast, no crash         |        |
| 14.2 | All mutation onError handlers | Every mutation has onError with realistic toast |        |
| 14.3 | Network timeout               | Shows error toast, not infinite spinner         |        |
| 14.4 | 401 unauthorized              | Redirects to login page                         |        |
| 14.5 | API server down               | Shows connection error, app doesn't crash       |        |

14B: UI Edge Cases

| #    | Test                               | Expected Result                       | Status |
|------|------------------------------------|---------------------------------------|--------|
| 14.6 | Double-click prevention on buttons | Buttons disabled during pending state |        |

|       |                                     |                                                 |  |
|-------|-------------------------------------|-------------------------------------------------|--|
| 14.7  | Empty input validation              | Empty form submissions show validation errors   |  |
| 14.8  | Page refresh mid-flow               | State recovered or gracefully handled           |  |
| 14.9  | Empty states for all lists          | All lists show "no data" message when empty     |  |
| 14.10 | Long text truncation                | Long names/descriptions truncated with ellipsis |  |
| 14.11 | Content doesn't overflow containers | No horizontal scrollbar on content areas        |  |
| 14.12 | Tab animation transitions           | No flickering or jarring tab switches           |  |

14C: Browser & Responsive

| #     | Test                            | Expected Result                                   | Status |
|-------|---------------------------------|---------------------------------------------------|--------|
| 14.13 | Chrome rendering                | All features work in Chrome                       |        |
| 14.14 | No console errors on load       | Clean console (no red errors) on page load        |        |
| 14.15 | No "Illegal constructor" errors | No native API conflicts                           |        |
| 14.16 | Desktop layout (1280px+)        | Full sidebar, multi-column grids                  |        |
| 14.17 | Tablet layout (~768px)          | Sidebar collapses, grids reduce columns           |        |
| 14.18 | Mobile layout (~375px)          | Hamburger menu, single column, no overflow        |        |
| 14.19 | Dark theme consistent           | Navy/dark background across all pages             |        |
| 14.20 | Crimson accent color used       | Primary actions, CTAs use crimson (#DC2626)       |        |
| 14.21 | Glass-card styling              | Glass morphism effect on cards (border, backdrop) |        |
| 14.22 | Framer Motion animations        | Page transitions and element loads animated       |        |
