

PMG GROUP OS

Complete Testing & Verification Checklist

Based on: PMG OS Blueprint v2 + v3 | 32 Agents | 6 Sections | 3 AI Modes | 75+ Detailed Test Items

Login Credentials:

Email: shershah_nawabi@pmgggroup-llc.com
Password: PMGAdmin2024!

HOW TO USE THIS DOCUMENT

Each test item below includes a detailed explanation of how the feature works, what it should do in each of the 3 AI modes, and a pre-generated answer describing what PASS, PARTIAL, and FAIL look like. Simply test the feature, then circle or highlight your result.

STATUS OPTIONS:

- PASS - Works exactly as described
- PARTIAL - Works but has cosmetic issues or missing minor features
- FAIL - Broken, missing, or does nothing when clicked
- N/A - Not applicable or not yet built

THE 3 AI MODES EXPLAINED

AI AUTONOMOUS MODE

The system runs AI agents automatically without asking you first. No yellow or blue banners appear at the top of pages. All AI buttons are visible and active. When you click "Find Prospects" or "Create Content", the AI runs immediately and stores the result. You get notified when something is done. High-confidence actions may execute without you clicking anything. Best for: when you trust the AI and want maximum speed.

HYBRID MODE (DEFAULT)

A YELLOW banner appears at the top of each page saying "Hybrid Mode". Items show badges: "AI" (generated by AI), "Human" (needs your input), "Review" (needs your approval). When AI confidence is high (above 80%), it executes automatically. When confidence is low (below 50%), the item gets queued in "Pending Actions" for your review. You can then Approve, Edit, Reject, or Delegate each item. Best for: balanced control where AI helps but you make final decisions.

HUMAN CONTROLLED MODE

A BLUE banner appears at the top of each page saying "Human Controlled". A collapsible "Workflow Guide" panel appears showing step-by-step instructions for what to do manually. Some AI buttons are hidden entirely since you are doing the work yourself. AI is available only as a tool when YOU choose to use it. Best for: when you want full manual control and use AI only for specific tasks.

0. LOGIN & GLOBAL LAYOUT

These are the foundational elements visible before entering any section. The global layout includes the sidebar navigation, top bar with search/notifications/wallet/AI mode toggle, and the help guide system.

0.1 — Login with admin credentials

HOW IT WORKS:

Go to the app URL. Enter email (shershah_nawabi@pmgggroup-llc.com) and password (PMGAdmin2024!) on the login screen. The system authenticates against the database, creates a session cookie, and redirects you to the Dashboard. Your session stays active until you log out.

IN AI AUTONOMOUS MODE:

Login works identically in all modes. AI mode does not affect authentication. After login you land on the Dashboard with no mode banner.

IN HYBRID MODE:

Login works identically. After login you see the Dashboard with a yellow "Hybrid Mode" banner at the top.

IN HUMAN CONTROLLED MODE:

Login works identically. After login you see the Dashboard with a blue "Human Controlled" banner at the top.

EXPECTED RESULT:

PASS if you see the Dashboard after entering credentials. FAIL if you get an error message, stay on the login screen, or see a blank page.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.2 — Sidebar shows all 7 navigation items

HOW IT WORKS:

The left sidebar should display 7 navigation items grouped under 3 labels: "Main" contains Dashboard, "Revenue Engine" contains Outreach + CRM, "Growth" contains Marketing + Production, "Operations" contains Admin + Finance, and Settings sits at the bottom. Each is clickable and navigates to that section's page. The sidebar can be collapsed to icon-only mode using the chevron button.

IN AI AUTONOMOUS MODE:

All sections visible. No items hidden based on mode.

IN HYBRID MODE:

All sections visible. No items hidden.

IN HUMAN CONTROLLED MODE:

All sections visible. No items hidden.

EXPECTED RESULT:

PASS if all 7 items (Dashboard, Outreach, CRM, Marketing, Production, Admin, Finance, Settings) are visible and clickable.
FAIL if any section is missing from the sidebar.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.3 — Sidebar grouping labels

HOW IT WORKS:

Sections are organized under group headers: "Main" for Dashboard, "Revenue Engine" for Outreach + CRM, "Growth" for Marketing + Production, "Operations" for Admin + Finance. These labels help you understand the logical organization of the system. When sidebar is collapsed, only icons show.

IN AI AUTONOMOUS MODE:

Group labels visible in all modes.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same.

EXPECTED RESULT:

PASS if group headers ("Main", "Revenue Engine", "Growth", "Operations") are visible above their respective sections.
PARTIAL if sections work but no group labels.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.4 — Global Search in top bar

HOW IT WORKS:

A search icon in the top navigation bar. Clicking opens a search overlay or dropdown. You type a keyword (like a lead name, company name, or action like "invoice") and the system searches across all sections: leads, content, tasks, invoices, etc. Results should be clickable and navigate to the matching item.

IN AI AUTONOMOUS MODE:

Search works identically in all modes. Results include AI-generated items.

IN HYBRID MODE:

Same search. Results may include items pending review.

IN HUMAN CONTROLLED MODE:

Same search. Fewer AI-generated results to find.

EXPECTED RESULT:

PASS if search opens and returns relevant clickable results. PARTIAL if it opens but returns no results or irrelevant results.
FAIL if the search icon does nothing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.5 — Notification Bell in top bar

HOW IT WORKS:

A bell icon showing a badge with the count of unread notifications. Clicking shows a dropdown listing recent events: new leads added, tasks completed, AI agents finished processing, system alerts. Each notification shows a title, description, and timestamp. You can "Mark as Read" individually or "Mark All Read" to clear badges.

IN AI AUTONOMOUS MODE:

More notifications appear because AI agents are actively processing work in the background and generating alerts.

IN HYBRID MODE:

Notifications include items needing your review/approval, plus completed items.

IN HUMAN CONTROLLED MODE:

Fewer notifications since AI runs less frequently. Mostly manual action confirmations.

EXPECTED RESULT:

PASS if bell shows count badge, dropdown lists notifications with titles/timestamps, and clicking a notification navigates to the relevant item. PARTIAL if bell shows but clicking doesn't navigate. FAIL if no bell icon exists.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.6 — Wallet Display in sidebar

HOW IT WORKS:

Shows the AI spending wallet balance as a dollar amount in the sidebar (below the AI mode toggle). In development/dummy mode, this stays fixed at \$355.02 regardless of how many AI calls you make. In a real production environment, each AI call would deduct a small amount (typically \$0.01-\$0.10 per call). The wallet tracks spending across 4 budget pools: Standard, Premium, Creative, and System.

IN AI AUTONOMOUS MODE:

Balance displayed. In production, autonomous AI calls would spend the wallet faster since all 32 agents run continuously.

IN HYBRID MODE:

Same display. Fewer auto-calls means slower spending — agents run only when triggered.

IN HUMAN CONTROLLED MODE:

Same display. Minimal spending since you control when AI runs.

EXPECTED RESULT:

PASS if you see "\$355.02" (or current balance) in the sidebar. FAIL if no wallet display is visible.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.7 — AI Mode Toggle in sidebar

HOW IT WORKS:

A toggle control in the sidebar showing the current AI mode with a colored indicator. Clicking cycles between three modes: AI Autonomous (crimson/red), Hybrid (blue), and Human Controlled (yellow). After switching, the change should immediately affect ALL pages: banners appear or disappear, certain AI buttons show or hide, and badges change. You can also change modes in Settings > AI Modes for more granular per-section control.

IN AI AUTONOMOUS MODE:

Shows "AI Auto" with crimson indicator. No restriction banners on pages. All AI automation buttons visible.

IN HYBRID MODE:

Shows "Hybrid" with blue indicator. Yellow/blue banner appears on all pages saying "Hybrid Mode — AI prepares, you review".

IN HUMAN CONTROLLED MODE:

Shows "Human" with yellow indicator. Blue banner appears on all pages saying "Manual Control — AI on standby".

EXPECTED RESULT:

PASS if you can switch between all 3 modes and page banners/buttons update immediately. PARTIAL if toggle works but pages don't visually change. FAIL if the toggle doesn't work or is missing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.8 — Help Guide [?] buttons

HOW IT WORKS:

Each section in the sidebar has a small [?] help icon that appears when you hover. Clicking opens a centered modal card slideshow that explains what that section does and how to use each tab. The guide shows: a progress bar at top, step heading with icon, description, animated mockup preview of the feature, and a mode-aware tip at the bottom that changes based on your current AI mode. Navigate with Previous/Next buttons and dot indicators. Close with X or "Done" on last step.

IN AI AUTONOMOUS MODE:

Guide available. Mode tip at bottom explains how this feature works in AI Autonomous mode (crimson colored box).

IN HYBRID MODE:

Guide available. Mode tip explains how this feature works in Hybrid mode (blue colored box).

IN HUMAN CONTROLLED MODE:

Guide available. Mode tip explains how this feature works in Manual Control mode (yellow colored box).

EXPECTED RESULT:

PASS if clicking opens guide with step-by-step content, mockup previews, and mode-aware tips that change when you switch AI modes. PARTIAL if opens but no mode tips or minimal content. FAIL if no guide button or it does nothing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.9 — Logout

HOW IT WORKS:

A logout button at the bottom of the sidebar (LogOut icon). Clicking shows a confirmation dialog: "Sign Out? You will be logged out of PMG OS. Any unsaved changes will be lost." with Cancel and Sign Out buttons. Confirming destroys your session and returns to the login screen. You should not be able to access any page without logging in again.

IN AI AUTONOMOUS MODE:

Same in all modes. Logout works identically regardless of AI mode.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same.

EXPECTED RESULT:

PASS if clicking logout shows confirmation, confirming returns to login screen, and you cannot access pages without logging back in. FAIL if logout button is missing or you stay logged in.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

0.10 — Mode Indicator Banner on all pages

HOW IT WORKS:

A colored banner appears at the top of every section page (below the header bar) indicating the current AI mode. The banner shows the mode name, a brief description, and an icon. It should be visible on Dashboard, Outreach, CRM, Marketing, Production, Admin, and Finance pages.

IN AI AUTONOMOUS MODE:

No restriction banner (or a crimson "AI Autonomous" badge). All AI buttons fully visible and active.

IN HYBRID MODE:

Yellow/blue banner: "Hybrid Mode — AI prepares, you review and approve". AI/Human/Review badges appear on items.

IN HUMAN CONTROLLED MODE:

Blue banner: "Manual Control — AI on standby". Some AI automation buttons hidden. Workflow guide available.

EXPECTED RESULT:

PASS if correct banner appears on every page and updates when mode changes. PARTIAL if banner only shows on some pages. FAIL if no banner appears anywhere.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

1. DASHBOARD (Command Center)

The Dashboard is your command center — the first page you see after login. It provides a high-level overview of your entire business: key metrics (KPI cards), quick action shortcuts, pipeline summary, recent leads, and system health status.

1.1 — KPI Cards display

HOW IT WORKS:

The main area shows 6 metric cards: Total Leads (count of all leads), Qualified (leads scored 80+), Active Deals (open opportunities in pipeline), Won Deals (closed_won count), Revenue (total from won deals), and Pending Tasks (incomplete tasks). These numbers pull from the database and reflect real data. Cards have icons, numbers, and subtle animations on load.

IN AI AUTONOMOUS MODE:

All KPIs auto-update as AI agents score leads, advance deals, and process data. Numbers change in real-time. "AI Routed" badges appear on leads.

IN HYBRID MODE:

KPIs update, but some items may be "pending your review" before counting toward metrics. "Needs Review" badges on items.

IN HUMAN CONTROLLED MODE:

KPIs only update when you manually process items. Numbers reflect your manual work only. Status badges show stage names.

EXPECTED RESULT:

PASS if all 6 cards show with numbers (even if zero on fresh system). Cards should have icons, animated entrance, and mode-specific badges. PARTIAL if cards show but numbers seem wrong or no mode badges. FAIL if cards are missing or showing error messages.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

1.2 — Quick Action shortcuts

HOW IT WORKS:

Four action buttons in a grid that jump to common tasks: "Find Prospects" (goes to Outreach > Prospect Finder), "View Pipeline" (goes to CRM > Pipeline), "Create Content" (goes to Production > Creative), "Open Settings" (goes to Settings). Each button has an icon, label, description, and hover animation (scale effect).

IN AI AUTONOMOUS MODE:

All shortcuts visible: "Find Prospects", "View Pipeline", "Create Content", "Open Settings". All navigate correctly.

IN HYBRID MODE:

All shortcuts visible. Same navigation.

IN HUMAN CONTROLLED MODE:

"Enter Prospects Manually" replaces "Find Prospects" to reflect manual workflow. Other shortcuts remain the same.

EXPECTED RESULT:

PASS if all 4 buttons navigate to correct destination and show hover animations. In Human mode, "Find Prospects" should change to "Enter Prospects Manually". FAIL if buttons do nothing or go to wrong page.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

1.3 — Pipeline Summary

HOW IT WORKS:

A card showing pipeline stages with deal counts: New Lead, Meeting Set, Discovery, Proposal, Negotiation, Won. Each stage has a progress bar with width proportional to deal count. Up to 3 top deals listed below with company name, stage, and dollar value. "View All" link navigates to CRM.

IN AI AUTONOMOUS MODE:

Shows all deals including those auto-advanced by AI. Deals have "Auto-Advanced" badges.

IN HYBRID MODE:

Shows all deals with "Review Required" badges on AI-processed ones.

IN HUMAN CONTROLLED MODE:

Shows only manually managed deals. Stage names shown as badges.

EXPECTED RESULT:

PASS if pipeline stages visible with deal counts and progress bars, top deals listed, and "View All" links to CRM. PARTIAL if visible but empty (acceptable on new system with "No deals yet" message). FAIL if section missing entirely.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

1.4 — Recent Leads

HOW IT WORKS:

A card showing up to 5 recent leads from the database. Each lead shows first/last name, company name, and a mode-specific badge. Below the list, a mode-aware annotation explains how leads are being processed. "View All" links to Outreach.

IN AI AUTONOMOUS MODE:

Leads show "AI Routed" badge. Annotation: "All leads auto-scored and routed by AI".

IN HYBRID MODE:

Leads show "Needs Review" or "Reviewed" badge. Annotation: "AI scored — your approval needed".

IN HUMAN CONTROLLED MODE:

Leads show status name badge. Annotation: "Manual tracking — no AI processing".

EXPECTED RESULT:

PASS if recent leads display with names, companies, correct badges per mode, and annotation text. "View All" links to / outreach. PARTIAL if leads show but no mode badges. FAIL if section missing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

1.5 — System Status

HOW IT WORKS:

A card showing 6 module status indicators: AI Engine, Wallet, Outreach, CRM, Marketing, Production. Each shows a colored dot (green = active, pulsing = autonomous, yellow = standby) and a mode-specific description. Gives at-a-glance system health.

IN AI AUTONOMOUS MODE:

All modules show green pulsing dots with descriptions like "Full auto — all agents active", "Auto-prospecting active".

IN HYBRID MODE:

Green dots with "AI + human review" descriptions.

IN HUMAN CONTROLLED MODE:

Yellow dots with "Manual only — AI standby" descriptions.

EXPECTED RESULT:

PASS if all 6 modules listed with correct colored dots and mode-aware descriptions that change when you switch modes. FAIL if system status card is missing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2. OUTREACH (6 Agents)

The Outreach section is your revenue engine starting point. It has 6 tabs, each powered by a dedicated AI agent: Prospect Finder (Agent 1), Social Command Center (Agent 2), Strategy (Agent 3), Compose (Agent 4), Follow-ups (Agent 5), and Analytics (Agent 6). The flow: Find Prospects > Plan Approach > Draft Messages > Send & Follow-up > Review Analytics.

2.1 — Tab Navigation — 6 tabs visible and working

HOW IT WORKS:

The Outreach page shows 6 tabs: Prospect Finder, Social Command, Strategy, Compose, Follow-ups, Analytics. Default tab is Prospect Finder. Clicking each tab switches content with animation. Active tab has distinct border/highlight styling.

IN AI AUTONOMOUS MODE:

All 6 tabs visible in all modes.

IN HYBRID MODE:

Same — all tabs visible.

IN HUMAN CONTROLLED MODE:

Same — all tabs visible. Content within tabs may differ.

EXPECTED RESULT:

PASS if all 6 tabs render, clicking switches content with animation, and active tab is highlighted. FAIL if any tab is missing or clicking does nothing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2.2 — Prospect Finder — "Find Prospects" button

HOW IT WORKS:

This is where it all starts. Click "Find Prospects" and optionally enter search criteria (industry focus, location, company size). Agent 1 (Prospect Intelligence) researches cybersecurity and IT companies, analyzes their marketing weaknesses (bad website, no social presence, weak SEO), verifies contact info (email, LinkedIn), and scores each prospect on Fit (0-100) and Accessibility (0-100). Returns a ranked list of prospect cards with company name, scores, and contact details.

IN AI AUTONOMOUS MODE:

Button visible and prominent. AI runs immediately on click. Results appear within seconds. No approval needed. Each prospect card shows action buttons.

IN HYBRID MODE:

Button visible. AI runs when you click. Results appear with "AI Generated" badge. You review the list before taking action.

IN HUMAN CONTROLLED MODE:

Button may be hidden or replaced with "Create Lead" (manual entry). You enter company details yourself. AI may assist with scoring only if requested.

EXPECTED RESULT:

PASS if clicking returns a list of prospect cards with company names, fit/accessibility scores, and contact info. Toast notification confirms "AI Prospecting Complete". PARTIAL if results appear but missing scores or contacts. FAIL if button does nothing, shows endless spinner, or returns an error.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2.3 — Prospect Finder — "Save All to CRM" bulk action

HOW IT WORKS:

A button at the top of the results list that saves ALL displayed prospects as leads at once. After clicking: a success toast confirms how many were saved, and all leads should appear in the CRM section. Individual prospect cards also have save/ action buttons.

IN AI AUTONOMOUS MODE:

Bulk save works. All leads auto-flow to pipeline and get scored by Agent 7.

IN HYBRID MODE:

Bulk save works. All leads appear as "Pending Review" in CRM.

IN HUMAN CONTROLLED MODE:

Bulk save works the same way — saving is always a manual action.

EXPECTED RESULT:

PASS if clicking saves all prospects (toast confirms count) AND the leads appear in CRM. PARTIAL if saves but leads don't show in CRM. FAIL if clicking does nothing or shows error.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2.4 — Social Command Center — unified inbox

HOW IT WORKS:

All messages from all connected platforms (LinkedIn, Facebook, Email, X/Twitter) in one view. Each message shows: platform icon, sender name, message preview, timestamp, and classification label (Hot Lead, Warm, Cold, Spam). AI-prepared response drafts shown for each message. "Send" buttons per message and "Move to CRM" button for positive responses.

IN AI AUTONOMOUS MODE:

Messages auto-classified. Responses auto-drafted. Hot leads may auto-move to CRM. Full AI processing.

IN HYBRID MODE:

Messages classified by AI. Drafts prepared. You review before sending or moving to CRM.

IN HUMAN CONTROLLED MODE:

Messages shown but not auto-classified. You read, categorize, and respond manually.

EXPECTED RESULT:

PASS if inbox shows messages with platform icons, classification labels (Hot/Warm/Cold/Spam), response drafts, Send buttons, and Move to CRM buttons. PARTIAL if messages show but no classification or no drafts. FAIL if inbox is empty or broken.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2.5 — Strategy — multi-channel approach plans

HOW IT WORKS:

Agent 3 creates strategy cards showing a multi-channel sequence plan for each prospect: Day 1 LinkedIn connection, Day 3 value post, Day 7 email with case study, Day 14 direct pitch. Shows decision chain mapping (CEO > CTO > Marketing Director). "Draft Messages" button triggers Agent 4 for message composition.

IN AI AUTONOMOUS MODE:

AI generates complete approach strategies automatically per prospect.

IN HYBRID MODE:

AI drafts strategy plans that you can modify before execution. "Draft Messages" button available.

IN HUMAN CONTROLLED MODE:

Strategy planning is manual. Tab serves as a reference. AI strategy buttons hidden or labeled differently.

EXPECTED RESULT:

PASS if strategy cards display with day-by-day sequence and decision chain, plus "Draft Messages" button. PARTIAL if cards show but missing sequence details. FAIL if tab is blank.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2.6 — Compose — personalized message drafts

HOW IT WORKS:

Agent 4 generates personalized messages per channel (LinkedIn DM, Email, Call Script). Each message references the prospect's specific business details (company name, pain points). Messages adapt tone by role: C-Suite = strategic, IT Directors = technical, Marketing = results-focused. No forbidden words (leverage, synergy, cutting-edge, game-changing). "Review & Send" buttons per message.

IN AI AUTONOMOUS MODE:

AI writes fully personalized messages per channel. You review and click Send.

IN HYBRID MODE:

AI provides drafts with confidence scores. High-confidence = ready; low-confidence = needs editing.

IN HUMAN CONTROLLED MODE:

Compose all messages yourself. Template suggestions available as starting points.

EXPECTED RESULT:

PASS if message drafts display per channel, reference prospect details, have correct tone, and contain no forbidden words. "Review & Send" buttons work. FAIL if no messages generated or content is generic.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2.7 — Follow-ups — tracking and escalation

HOW IT WORKS:

Agent 5 manages follow-up reminders with timing. Shows list of upcoming follow-ups with status (Sent, Pending, Scheduled, Overdue). "Send Follow-up" drafts messages referencing previous touchpoints. Escalation logic: after 3 LinkedIn attempts > suggests email > then phone. Signal detection shows warm signals (profile views, email opens).

IN AI AUTONOMOUS MODE:

AI automatically schedules follow-ups and escalates across channels (LinkedIn > Email > Phone).

IN HYBRID MODE:

AI suggests follow-up timing and channel. You confirm before sending.

IN HUMAN CONTROLLED MODE:

Manually track and schedule your follow-ups. Reminders are time-based only.

EXPECTED RESULT:

PASS if follow-up list shows with timing, status, escalation suggestions, and "Send Follow-up" button works. PARTIAL if list shows but no escalation logic. FAIL if tab is empty.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

2.8 — Analytics — outreach metrics

HOW IT WORKS:

Dashboard showing reply rates per channel (LinkedIn vs email vs phone), open rates, acceptance rates, conversion rates (outreach > lead > meeting). Identifies winners: "Case study email has 34% reply rate vs 8% for intro emails." Charts/graphs render without overflow. "Apply Recommendation" buttons update strategy.

IN AI AUTONOMOUS MODE:

Analytics auto-update. AI applies optimization recommendations automatically based on performance data.

IN HYBRID MODE:

Analytics visible. You click "Apply Recommendation" to accept or modify suggestions.

IN HUMAN CONTROLLED MODE:

View raw analytics data. All strategy changes require your manual action.

EXPECTED RESULT:

PASS if charts/numbers display with meaningful data, winner/loser identification, and "Apply Recommendation" buttons. PARTIAL if analytics exist but limited. FAIL if tab is blank.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

3. CRM (5 Agents)

CRM tracks every lead from first contact to closed deal. Pipeline stages: New Lead > Meeting Set > Discovery Call > Proposal Sent > Negotiation > Closed Won/Lost. Five agents manage: lead scoring (Agent 7), deal intelligence (Agent 8), call coaching (Agent 9), proposals (Agent 10), and external CRM sync (Agent 11).

3.1 — Pipeline View — Kanban board

HOW IT WORKS:

A visual pipeline (kanban board with columns or horizontal stages) showing all deals. Each deal is a card with: company name, contact name, deal value (\$), and health indicator (green = healthy, yellow = stale, red = at risk). You can click cards to open detail panels. Stages: New Lead, Meeting Set, Discovery, Proposal, Negotiation, Won, Lost. Total pipeline value displayed.

IN AI AUTONOMOUS MODE:

Deals may auto-advance based on Agent 8 analysis (e.g., meeting completed > auto-move to Discovery). "Auto-Advanced" badges on cards.

IN HYBRID MODE:

AI recommends stage changes with "Review Required" badges. You drag/click to confirm advancement.

IN HUMAN CONTROLLED MODE:

You manually move deals between stages. No auto-advancement. Health indicators still show.

EXPECTED RESULT:

PASS if pipeline columns visible with deal cards showing name, value, health indicators, and clickable detail panels. Total value shown. PARTIAL if visible but not interactive. FAIL if page is blank.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

3.2 — Lead Scoring (Agent 7) — 5 dimensions

HOW IT WORKS:

Each lead gets a total score (0-100) from Agent 7, broken into 5 dimensions with weights: Company Fit 30% (size, industry match), Marketing Need 25% (how badly they need help), Budget Likelihood 20% (can they afford PMG), Timing Urgency 15% (hiring, contract renewals), Authority Level 10% (is contact the decision maker). Score determines category: Hot 80+ (fire icon), Warm 50-79 (yellow), Cold 20-49 (snowflake), Disqualified <20 (gray X). Reasoning shown: "Scored 87: 500-employee cybersec firm, no marketing team, just raised \$10M."

IN AI AUTONOMOUS MODE:

Leads auto-scored immediately when they enter CRM from any source. Hot leads auto-routed to pipeline.

IN HYBRID MODE:

AI scores leads but waits for your confirmation before routing. You can view breakdown and override scores.

IN HUMAN CONTROLLED MODE:

Lead scores shown from initial data. You request scoring on individual leads or manually assign scores.

EXPECTED RESULT:

PASS if score breakdown shows all 5 dimensions with weights, category label (Hot/Warm/Cold), and reasoning text. "Set Meeting" button on hot leads. PARTIAL if total score shows but no breakdown. FAIL if no scoring visible.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

3.3 — Call Intelligence (Agent 9) — coaching and analysis

HOW IT WORKS:

Three sections: Pre-Call Prep (generates full briefing with who they are, pain points, talking points, company research), Coaching Cards (specific objection handling: "If they say 'we already have an agency' respond: 'What results are they getting? We guarantee 20 qualified leads in month one.'"), and Transcript Analysis (upload Zoom/meeting transcript for AI analysis returning sentiment, decisions, action items, deal score, and auto-drafted follow-up email).

IN AI AUTONOMOUS MODE:

Briefings auto-generated. Cards auto-displayed. Transcripts auto-analyzed. Follow-ups auto-drafted and may auto-send.

IN HYBRID MODE:

AI prepares briefings and analysis. Coaching cards available. Follow-up drafts need your review before sending.

IN HUMAN CONTROLLED MODE:

Upload transcripts for reference. Briefings and coaching cards are not auto-generated. You can request them.

EXPECTED RESULT:

PASS if Pre-Call Prep generates briefing, Coaching Cards show specific objection/response pairs, and Transcript Analysis returns sentiment + action items + follow-up email. PARTIAL if some sections work. FAIL if no coaching available.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

3.4 — Proposal Generation (Agent 10)

HOW IT WORKS:

Click "Create Proposal" on a deal. Agent 10 generates a customized proposal with: Scope tailored to prospect's specific marketing gaps, Timeline ("Month 1: Audit + 20 leads. Month 2: Full campaign launch"), Pricing tiers (Starter \$2,500/mo, Growth \$5,000/mo, Enterprise \$10,000/mo), and relevant case studies. Proposal preview shows before sending. Status tracks: Sent > Viewed > Under Review > Accepted > Rejected. If accepted, "Generate Contract" button appears.

IN AI AUTONOMOUS MODE:

Proposal auto-generates when deal reaches Proposal stage. Full preview for review.

IN HYBRID MODE:

You click to generate. Full preview for editing before sending. You approve before delivery.

IN HUMAN CONTROLLED MODE:

You create proposal manually. AI provides a draft template to work from.

EXPECTED RESULT:

PASS if proposal generates with custom scope, timeline, pricing tiers (\$2,500/\$5,000/\$10,000), preview, and "Send Proposal" button. Status tracks through Sent > Viewed > Accepted. PARTIAL if generates but template-like. FAIL if nothing generates.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

3.5 — CRM Sync (Agent 11) — external integrations

HOW IT WORKS:

Shows sync status with external CRMs: GoHighLevel (main account + partner sub-accounts) and HubSpot. Each shows: Connected/Disconnected status, last sync time, records synced, and any errors. Deals can be flagged as "Partner Close" to auto-push to partner's GHL sub-account. "Sync Now" button for manual sync. Error queue shows failed syncs with retry option.

IN AI AUTONOMOUS MODE:

Sync runs automatically and continuously. Partner deals auto-push. Data updates in real-time.

IN HYBRID MODE:

Sync runs on schedule. Errors are flagged for your review. You trigger manual syncs.

IN HUMAN CONTROLLED MODE:

Manual sync only. Click "Sync Now" to push updates. You control when data moves.

EXPECTED RESULT:

PASS if sync cards show with status indicators, last sync time, partner flag option, and "Sync Now" button. PARTIAL if cards show but no real sync capability (expected in demo). FAIL if tab is empty.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

4. MARKETING (5 Agents)

Marketing promotes PMG Group's services and drives inbound leads. Five agents handle: content strategy and creation (Agent 12), paid advertising campaigns (Agent 13), SEO and growth (Agent 14), multi-channel campaign orchestration (Agent 15), and competitor intelligence monitoring (Agent 16).

4.1 — Content Strategy (Agent 12) — calendar and creation

HOW IT WORKS:

Shows planned content across all channels with a calendar view: LinkedIn (3 posts/week), Facebook/Instagram (5 posts/week), Blog (2 articles/month), X/Twitter (daily), YouTube (2 videos/month). Each content slot shows: platform, content type, status (Draft/Scheduled/Published), and preview snippet. "Create Content" / "AI Content Plan" button generates content or plans. Full creation flow: select type > describe topic > AI generates in PMG brand voice > preview > review/edit > approve > publish. Status tracks: Draft > Review > Approved > Published.

IN AI AUTONOMOUS MODE:

Calendar auto-populated by Agent 12. AI auto-generates content from strategy. Posts may auto-schedule. Content repurposing: 1 blog > LinkedIn + social + email.

IN HYBRID MODE:

AI suggests content calendar and topics. You approve, modify, or reject individual posts before scheduling.

IN HUMAN CONTROLLED MODE:

You build the calendar manually. AI helps write content for slots you assign. AI creation buttons may be hidden.

EXPECTED RESULT:

PASS if content calendar shows with channel breakdown, "Create Content" generates content with preview, and status flow works (Draft > Publish). PARTIAL if calendar exists but creation flow broken. FAIL if no calendar view.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

4.2 — Campaigns (Agent 13) — ad campaign management

HOW IT WORKS:

"Create Campaign" opens campaign builder with platform targets: Facebook, LinkedIn, Google, YouTube. Campaign package includes: ad copy, targeting criteria, budget (\$600 campaign budget), schedule, and A/B variations. "Review" > "Launch" flow (manual launch only — never auto-publishes). Performance tracking: cost per lead, cost per meeting, ROAS per platform. Campaign list shows statuses: Active (green), Paused (yellow), Draft (gray).

IN AI AUTONOMOUS MODE:

AI builds complete campaign packages (copy, targeting, budget). You launch manually — AI never auto-publishes ads.

IN HYBRID MODE:

AI drafts campaigns. You review targeting and copy before launch.

IN HUMAN CONTROLLED MODE:

Build campaigns from scratch. Templates available for each platform. AI campaign builder disabled.

EXPECTED RESULT:

PASS if "Create Campaign" works, platform targets shown, campaign list with statuses visible, and performance metrics display. "Launch" button works. PARTIAL if some parts work but chain breaks. FAIL if button does nothing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

4.3 — SEO & Growth (Agent 14)

HOW IT WORKS:

"Run SEO Audit" generates website audit report with visual scores for performance areas. Keyword research results show keywords with intent and competition levels. Ranked fixes list ordered by impact. "Create Content" button per keyword gap triggers content creation. Ranking/traffic tracking shows position and organic traffic trends.

IN AI AUTONOMOUS MODE:

AI runs SEO audits automatically and generates fix plans with content suggestions.

IN HYBRID MODE:

AI runs audits on request. Fix plans require your approval before execution.

IN HUMAN CONTROLLED MODE:

View ranking data manually. SEO audit button may not be available — use AI mode for audits.

EXPECTED RESULT:

PASS if "Run SEO Audit" generates report with scores, keywords, and ranked fixes. "Create Content" per gap works. PARTIAL if audit generates but limited data. FAIL if audit does nothing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

4.4 — Campaign Orchestrator (Agent 15)

HOW IT WORKS:

"Plan Campaign" creates multi-channel coordinated plan. Timeline view: Week 1 awareness > Week 2 engagement > Week 3 conversion. Full journey tracking: Impression > Visit > Form > Lead > Meeting > Client. Weekly campaign report with performance data and recommendations.

IN AI AUTONOMOUS MODE:

AI coordinates all campaign channels and optimizes spend automatically. Plans auto-generate.

IN HYBRID MODE:

AI suggests campaign plans. You confirm the timeline and budget allocation.

IN HUMAN CONTROLLED MODE:

Plan multi-channel campaigns manually. Journey tracking is view-only. AI planning disabled.

EXPECTED RESULT:

PASS if "Plan Campaign" generates timeline with phases, journey tracking visible, and weekly report available. PARTIAL if some elements work. FAIL if tab is non-functional.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

4.5 — Competitor Intel (Agent 16)

HOW IT WORKS:

Agent 16 scans competitor agencies: their content, ads, pricing, positioning. "Refresh Competitor Analysis" triggers scan. Creates competitive battle cards for sales calls with specific talking points. Gap identification: "No competitor offers lead generation guarantees" — PMG's unique advantage. Competitor alerts for significant moves.

IN AI AUTONOMOUS MODE:

AI scans competitors weekly and auto-updates battle cards. Alerts auto-distributed.

IN HYBRID MODE:

AI runs scans on request. You review findings before sharing with sales team.

IN HUMAN CONTROLLED MODE:

Competitor data is static reference. "Refresh" button may not be available in this mode.

EXPECTED RESULT:

PASS if battle cards appear with competitor names, talking points, and gap identification. "Refresh" button triggers scan with toast. PARTIAL if cards show but limited data. FAIL if nothing generates.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

5. PRODUCTION (8+ Agents)

Production handles client delivery: onboarding new clients, auditing their marketing, creating creative assets (images, videos, documents, branding), generating leads for clients (the "20 deals" promise), building campaigns and funnels, generating performance reports, syncing with client CRMs, and quality control review.

5.1 — Client Onboarding — checklist flow

HOW IT WORKS:

When a deal is won in CRM, onboarding begins. 7 steps in order: (1) Collect brand assets, (2) Get access to client systems, (3) Define target audience, (4) Document client services, (5) Set goals, (6) Choose CRM, (7) Configure partner sync. Steps should unlock sequentially. Progress bar shows completion percentage. After all steps complete, "Run Marketing Audit" button appears.

IN AI AUTONOMOUS MODE:

Some steps auto-complete if data available. Audit auto-triggers after all steps done.

IN HYBRID MODE:

You complete each step. AI assists with data collection and suggestions.

IN HUMAN CONTROLLED MODE:

You complete all steps manually without AI assistance. No auto-completion.

EXPECTED RESULT:

PASS if all 7 steps show, unlock sequentially, progress bar updates, and "Run Marketing Audit" appears at end. PARTIAL if steps show but don't unlock sequentially. FAIL if steps don't show or no progress tracking.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

5.2 — Marketing Audit (Agent 18)

HOW IT WORKS:

Deep audit of client's website, social media, paid ads, email, and SEO. Each area gets a score (0-100) and detailed analysis of what's wrong and how to fix it. Identifies exactly why the client is not getting leads. "Generate Fix Plan" button creates prioritized action items.

IN AI AUTONOMOUS MODE:

AI runs full audits and generates fix-it plans with priority rankings automatically.

IN HYBRID MODE:

AI runs audits on request. Fix plans need your approval before execution.

IN HUMAN CONTROLLED MODE:

Audit tab shows historical data only. Full audit requires AI mode to be enabled.

EXPECTED RESULT:

PASS if audit shows scores per area (Website, Social, Ads, Email, SEO), detailed analysis, and "Generate Fix Plan" works. PARTIAL if scores show but no detailed analysis. FAIL if audit tab is empty.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

5.3 — Creative Production — type selection and generation

HOW IT WORKS:

Select asset type: Image (DALL-E 3 for social graphics, ad creatives, blog headers), Video (Runway ML for social clips, explainers), Document (proposals, case studies, whitepapers), or Branding (logos, color palettes, brand guidelines). Text area for describing what you want. Click "Generate" — system calls correct AI. Loading spinner during processing. Preview appears when done. Download buttons: PNG/JPG for images, MP4 for video, PDF/DOCX for documents.

IN AI AUTONOMOUS MODE:

AI generates immediately. Select type, describe, get result. May auto-create from strategy schedules.

IN HYBRID MODE:

You select type, describe, generate. Preview for review before approval and download.

IN HUMAN CONTROLLED MODE:

AI generation is disabled. Upload your own creative assets to the library.

EXPECTED RESULT:

PASS if type selection highlights, prompt form appears, Generate calls AI, preview shows, and download works. PARTIAL if generates but no download or limited types. FAIL if generation does nothing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

5.4 — Client Lead Generator — "Generate Leads"

HOW IT WORKS:

THE CORE PROMISE: 20 qualified leads per client per month. Click "Generate Leads" for a selected client. Agent 20 researches the client's target market and returns a lead list. Each lead includes: company name, decision maker, verified contact, specific pain points, approach strategy, and quality score (only delivers 80+ scored leads). "Push to Client CRM" syncs to their GHL/HubSpot. "Add to PMG Pipeline" adds to your CRM.

IN AI AUTONOMOUS MODE:

Leads auto-generated monthly per client on schedule. Push to CRM continuously.

IN HYBRID MODE:

You trigger generation. Review lead quality before pushing to client CRM.

IN HUMAN CONTROLLED MODE:

Lead generation requires AI mode. View existing leads only in manual mode.

EXPECTED RESULT:

PASS if "Generate Leads" returns a list of 80+ scored leads with context, and "Push to Client CRM" / "Add to Pipeline" buttons work. PARTIAL if leads generated but limited data. FAIL if no leads generated.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

5.5 — Campaigns & Funnels — status toggles

HOW IT WORKS:

Each campaign shows status: Active (green), Paused (yellow), Draft (gray). "Launch" starts it, "Pause" stops temporarily, "Resume" restarts. Status changes immediately with color update. "View Funnel" expands showing conversion funnel: Ad (impressions) > Landing Page (visits) > Form (submissions) > Email Nurture > Sales Call.

IN AI AUTONOMOUS MODE:

AI builds complete funnels from ad to close. Campaigns may auto-launch when content is ready.

IN HYBRID MODE:

AI drafts funnel steps. You customize each step before activating. You control launch/pause.

IN HUMAN CONTROLLED MODE:

Build funnels manually step by step. AI funnel builder disabled.

EXPECTED RESULT:

PASS if status toggles change with color update AND funnel expands with conversion rates. PARTIAL if status works but no funnel view. FAIL if buttons don't work.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

5.6 — Quality Review (Agent 24) — badges and actions

HOW IT WORKS:

Agent 24 reviews all creative output. Each item gets a badge: "Ready to Publish" (green), "Needs Minor Edits" (yellow), "Needs Rewrite" (red). Actions: "Approve & Publish" changes to permanent green "Published". "Auto-Fix" calls AI to fix minor issues. "Regenerate" creates completely new version. Human tone check indicator shows if content sounds AI-generated.

IN AI AUTONOMOUS MODE:

Quality check auto-runs on all new content. "Ready" items may auto-publish.

IN HYBRID MODE:

Quality check runs. You decide: approve, fix, or regenerate each item.

IN HUMAN CONTROLLED MODE:

You request quality check. Make fixes yourself or ask AI. "Auto-Fix" button hidden.

EXPECTED RESULT:

PASS if badges visible (green/yellow/red), "Approve & Publish" changes status, "Auto-Fix" and "Regenerate" call AI with results. PARTIAL if badges show but actions don't work. FAIL if buttons do nothing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

5.7 — Reporting & CRM Sync

HOW IT WORKS:

"Generate Report" creates performance reports for clients in two formats: Executive (1-page C-suite summary) and Detailed (full data for marketing managers). Sections: leads generated, content published, campaign performance, pipeline status, ROI calculation ("150K pipeline from 5K spend = 30x ROI"). "Send to Client" delivers report. PDF export available. CRM sync pushes data to client's GHL/HubSpot.

IN AI AUTONOMOUS MODE:

AI auto-generates monthly reports and syncs all data continuously.

IN HYBRID MODE:

AI generates reports on request. You review and send to clients.

IN HUMAN CONTROLLED MODE:

View raw data only. Report generation requires AI mode to be active.

EXPECTED RESULT:

PASS if report generates with sections and ROI, downloadable as PDF, and CRM sync works. PARTIAL if generates but no PDF or sync. FAIL if nothing generates.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

6. ADMIN (4 Agents)

Admin manages internal operations: task assignments and daily action plans (Agent 25), knowledge base with SOPs and templates (Agent 26), executive morning briefings with risk alerts (Agent 27), and system evolution monitoring for new tools and trends (Agent 28).

6.1 — Operations (Agent 25) — task dashboard

HOW IT WORKS:

Shows task cards with: description, assigned team member, due date, priority (High/Medium/Low with color coding), and status (To Do/In Progress/Done/Overdue). Agent 25 creates daily action plans: "John: call these 5 leads. Sarah: publish these 3 posts." "Mark Complete" button per task shows checkmark. "Auto-Assign" redistributes tasks by capacity. "Add Task" creates new tasks. Overdue items highlighted in red.

IN AI AUTONOMOUS MODE:

Tasks auto-assigned based on skills, workload, urgency. Progress auto-tracked. "Auto-Assign" button visible.

IN HYBRID MODE:

AI suggests task assignments. You approve and reassign as needed.

IN HUMAN CONTROLLED MODE:

You assign all tasks manually. "Auto-Assign" button is hidden. No automatic distribution.

EXPECTED RESULT:

PASS if task cards display with assignees, priorities, due dates, and "Mark Complete" works. "Auto-Assign" visible in AI/Hybrid, hidden in Human. PARTIAL if tasks show but "Mark Complete" doesn't work. FAIL if dashboard empty or broken.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

6.2 — Knowledge Base (Agent 26)

HOW IT WORKS:

Shows 24 organized documents: SOPs, playbooks, templates, and training materials. Category chips/filters to browse by type. Search field to find documents. "View" button opens each document. "Auto-Update" button triggers AI to update knowledge base from recent activities.

IN AI AUTONOMOUS MODE:

AI auto-updates knowledge base with new content from recent activities. "Auto-Update" button visible.

IN HYBRID MODE:

AI suggests updates. You review and approve before they are published.

IN HUMAN CONTROLLED MODE:

Browse and search documents manually. "Auto-Update" button is hidden.

EXPECTED RESULT:

PASS if documents display with categories, search works, "View" opens documents, and "Auto-Update" is properly gated by mode. FAIL if knowledge base is empty or search broken.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

6.3 — Executive Briefing (Agent 27)

HOW IT WORKS:

Morning briefing with sections: Urgent Items (overdue invoices, expiring contracts, at-risk deals), Today's Priorities (ranked action list), Recent Wins, and Key Business Metrics. Each urgent item has "Go to" button linking to the relevant section (e.g., "Go to Finance" for overdue invoices). "Regenerate Briefing" refreshes data.

IN AI AUTONOMOUS MODE:

Briefing auto-generated daily with urgent items and action recommendations. "Generate Morning Briefing" button visible.

IN HYBRID MODE:

AI prepares briefings on request. You decide which items to act on.

IN HUMAN CONTROLLED MODE:

Briefing generation requires AI mode. View historical briefings only. Generation buttons hidden.

EXPECTED RESULT:

PASS if briefing shows priorities, urgent items, wins, metrics, and "Go to" buttons navigate correctly. "Generate" buttons properly gated by mode. PARTIAL if content exists but no "Go to" links. FAIL if no briefing at all.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

6.4 — System Evolution (Agent 28)

HOW IT WORKS:

Agent 28 scans the market weekly: new AI tools, platform updates, API changes. Shows report with recommendations and impact analysis. Each item has three decision buttons: "Approve" (creates task in Operations), "Explore Later" (review next month), "Skip" (dismiss). Important: AI never auto-approves system changes — you always decide. "Scan for Updates" triggers new scan.

IN AI AUTONOMOUS MODE:

Report auto-generated. "Scan for Updates" button visible. You still approve/skip each item.

IN HYBRID MODE:

Same — you review and decide on each recommendation.

IN HUMAN CONTROLLED MODE:

Scanning requires AI mode. "Scan for Updates" button hidden. View past recommendations only.

EXPECTED RESULT:

PASS if report shows recommendations with impact analysis and all 3 decision buttons (Approve/Explore/Skip) work. "Scan for Updates" gated by mode. FAIL if tab is empty or buttons don't record decisions.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

7. FINANCE (2 Agents)

Finance handles all money matters: invoicing and revenue tracking (Agent 29) and contracts, expenses, and forecasting (Agent 30). Invoice lifecycle: Draft > Sent > Viewed > Paid > Overdue. Revenue dashboard, MRR tracking, expense tracking, P&L, and scenario modeling.

7.1 — Billing & Revenue (Agent 29) — invoices and MRR

HOW IT WORKS:

Invoice list shows all invoices with: ID, client name, amount, status (Paid green, Sent blue, Overdue red, Draft gray), and date. "Create Invoice" opens invoice builder (select client, type, add line items, set due date). "Send Invoice" delivers. Auto-reminders at 7/14/30 days for unpaid. MRR metric displayed. Revenue breakdown per client. "Auto-Generate Monthly" creates recurring invoices for all active clients.

IN AI AUTONOMOUS MODE:

Recurring invoices auto-generate monthly. Reminders auto-send. "Auto-Generate Monthly" button visible.

IN HYBRID MODE:

You create and send. Reminders auto-scheduled but you approve sending.

IN HUMAN CONTROLLED MODE:

Create and send invoices manually. "Auto-Generate Monthly" button hidden.

EXPECTED RESULT:

PASS if invoice list shows with statuses, "Create Invoice" works, "Send Invoice" tracks status, MRR metric visible, and "Auto-Generate Monthly" properly gated by mode. PARTIAL if some features work. FAIL if tab is non-functional.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

7.2 — Contracts & Expenses (Agent 30)

HOW IT WORKS:

Contract list with: client, package tier (Starter \$2,500 / Growth \$5,000 / Enterprise \$10,000), monthly value, start/end dates. Contracts expiring soon flagged with alert (60-day warning). "Renew" button sends renewal proposal. "Draft Contract" button creates new contract. Expense tracking shows 4 categories: AI tools, advertising, software, team. Monthly P&L report (revenue vs expenses). Revenue forecasting with scenario modeling: "If we close X deals, revenue = \$Y." "Run Scenario Analysis" calculates projections.

IN AI AUTONOMOUS MODE:

Contracts auto-drafted on deal close. Expenses auto-tracked. Forecasts auto-update. "Draft Contract" and "Run Scenario Analysis" buttons visible.

IN HYBRID MODE:

You create contracts. Expenses auto-tracked. You review forecasts.

IN HUMAN CONTROLLED MODE:

You create contracts and log expenses manually. "Draft Contract" and "Run Scenario Analysis" buttons hidden.

EXPECTED RESULT:

PASS if contracts show with pricing tiers, expiry alerts work, expenses display, P&L visible, and scenario modeling runs. AI buttons gated by mode. PARTIAL if some features work. FAIL if tab is non-functional.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

8. SETTINGS (10 Tabs)

Settings controls all system configuration across 10 tabs: General (company info, branding, brand voice), AI Modes (global and per-section control), Wallet (balance, pools, spending controls), Users & Roles, Channels (connected platforms + anti-spam), Integrations, API Keys, Legal & Compliance, Notifications, and System Health (32 agents monitoring).

8.1 — General — company info and branding

HOW IT WORKS:

Edit: company name (PMG Group LLC), website, industry focus, timezone (EST/CST/MST/PST/UTC). Upload logo. Brand Identity: 4 color swatches — Primary (Crimson #DC2626), Background (Navy #0F172A), Text (White #F8FAFC), Accent (Gold #F59E0B). Font settings: Primary (Inter), Display (Clash Display). Brand Voice section: Tone (Authoritative), Terminology (NIST, SOC 2, SIEM, EDR), Forbidden Words (leverage, synergy, cutting-edge, game-changing, innovative), Content Rules. "Save Changes" button persists all settings.

IN AI AUTONOMOUS MODE:

Settings apply to all auto-generated content across all 32 agents.

IN HYBRID MODE:

Same settings. Apply to AI drafts you review.

IN HUMAN CONTROLLED MODE:

Same settings. Apply when you request AI assistance.

EXPECTED RESULT:

PASS if all fields are editable, color swatches display, forbidden words are listed, and "Save Changes" persists (reload page to verify). FAIL if fields don't save or page is broken.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

8.2 — AI Modes — global and per-section

HOW IT WORKS:

3 mode cards: AI Autonomous, Hybrid, Manual Control — each with description. Click to select (checkmark icon appears, colored border highlights). Below: Per-Section Overrides — 6 sections (Outreach, CRM, Marketing, Production, Admin, Finance) each with dropdown: "Inherit Global", "AI Autonomous", "Hybrid", "Manual Control". Changing one section doesn't affect others.

IN AI AUTONOMOUS MODE:

Selected as global mode. All sections inherit unless overridden.

IN HYBRID MODE:

Selected as global mode. Per-section overrides work independently.

IN HUMAN CONTROLLED MODE:

Selected as global mode. All AI buttons hidden on sections set to Human.

EXPECTED RESULT:

PASS if global switch works (checkmark, border, mode label updates) AND per-section overrides apply correctly (e.g., Outreach Autonomous + Finance Human). Mode change immediately reflected across all relevant pages. FAIL if switching has no effect.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

8.3 — Wallet — balance, pools, and controls

HOW IT WORKS:

Displays: Current Balance (\$355.02 or \$360.29), This Month Spent (\$89.71), Monthly Budget (\$450.00). Budget Pools: 4 pools (Standard, Premium, Creative, System) with progress bars showing spent/budget ratio and which agents use each pool. Spending Controls: Auto-pause toggle at low balance, Low Balance Threshold input (default \$50), Max Charge Per Agent input (default \$5).

IN AI AUTONOMOUS MODE:

Wallet critical — all 32 agents running continuously. Spending is highest in this mode.

IN HYBRID MODE:

Same display. Moderate spending since agents run only when triggered.

IN HUMAN CONTROLLED MODE:

Less spending since AI runs less. Minimal wallet usage.

EXPECTED RESULT:

PASS if balance/spent/budget display, 4 budget pools with progress bars, and 3 spending controls all present and interactive. Toggles switch states, inputs accept values. FAIL if wallet tab is broken or missing elements.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

8.4 — Users & Roles

HOW IT WORKS:

"Invite User" button to add team members. Current user card: "Sher Shah Nawabi" with email, "Super Admin" badge, and avatar initials (SN). Role definitions: 4 roles listed — Super Admin (full access), Admin (manage users + settings), Manager (manage sections), Viewer (read-only). User count per role shown.

IN AI AUTONOMOUS MODE:

Same in all modes. User management is not mode-dependent.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same.

EXPECTED RESULT:

PASS if current user card shows correctly, 4 roles defined with descriptions, and "Invite User" button is present. FAIL if user profile is missing or roles not defined.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

8.5 — Channels — connected platforms + anti-spam

HOW IT WORKS:

6 channels listed: Email, LinkedIn, Facebook, X (Twitter), YouTube, Slack — each with platform icon, connection status ("Not Connected" badge), description, and "Connect" button. Anti-Spam Protection section: 4 rules with switches — Email limit 50/day, LinkedIn 25/day, Social 30/week, Cool-down 2-5min between sends. All switches default ON.

IN AI AUTONOMOUS MODE:

Connected channels monitored by AI in real-time for Social Command Center.

IN HYBRID MODE:

Channels monitored on schedule. AI flags important messages for your review.

IN HUMAN CONTROLLED MODE:

Channels show status only. No AI monitoring in manual mode.

EXPECTED RESULT:

PASS if 6 channels listed with icons, connection status, "Connect" buttons, and anti-spam section with 4 working toggles. FAIL if channels missing or toggles broken.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

8.6 — Integrations, API Keys, Legal & Compliance, Notifications, System Health

HOW IT WORKS:

Integrations: 6 integrations (GHL, HubSpot, Hunter.io, Zoom, Google Analytics, Stripe) with "Configure" buttons. API Keys: 6 services (Claude, DALL-E 3, GPT-4o, Runway ML, ElevenLabs, Hunter.io) with Required/Optional badges, monthly cost estimates, and "Add Key" buttons. Estimated total: \$300-\$500/mo. Legal: CAN-SPAM, GDPR, TCPA toggles + anti-spam monitoring + contract templates (NDA, ToS, DPA, SLA) + opt-out management. Notifications: Per-category (Pipeline, Outreach, Production, Finance, System) with In-App/Email/Slack toggles. System Health: Overview + 32 agent statuses + API health + DB stats + "Run Health Check" button.

IN AI AUTONOMOUS MODE:

System Health shows all 32 agents active with green indicators. Full monitoring.

IN HYBRID MODE:

Agents activate on demand. Health checks run on schedule.

IN HUMAN CONTROLLED MODE:

Agents on standby. Run health check manually. Yellow standby indicators.

EXPECTED RESULT:

PASS if all 5 remaining settings tabs render with their respective content, buttons are clickable, toggles work, and System Health shows all 32 agents. PARTIAL if some tabs have limited content. FAIL if any tab is completely broken.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

9. CROSS-CUTTING: AI MODE BEHAVIOR

These tests verify that the 3 AI modes work consistently ACROSS all sections. Each mode should produce visibly different behavior: different banners, different button visibility, different badges on items, and different workflow guidance.

9.1 — AI Autonomous Mode — all pages

HOW IT WORKS:

Switch to AI Autonomous mode (via sidebar toggle or Settings > AI Modes). Visit every page: Dashboard, Outreach, CRM, Marketing, Production, Admin, Finance, Settings. Verify: NO restriction banner (or crimson "AI Autonomous" badge), ALL AI automation buttons visible (Find Prospects, Generate Leads, Auto-Assign, Auto-Generate Monthly, Draft Contract, Scan for Updates, Auto-Update, Generate Morning Briefing), Bot/sparkle icons visible on AI features, and "AI Routed" / "Auto-Advanced" badges on leads and deals.

IN AI AUTONOMOUS MODE:

This IS the mode being tested.

IN HYBRID MODE:

N/A — testing AI Autonomous specifically.

IN HUMAN CONTROLLED MODE:

N/A — testing AI Autonomous specifically.

EXPECTED RESULT:

PASS if all AI buttons visible, no restriction banners, and AI badges appear on items across every page. PARTIAL if works on some pages but not others. FAIL if mode switch has no visual effect.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

9.2 — Hybrid Mode — all pages

HOW IT WORKS:

Switch to Hybrid mode. Visit every page. Verify: Yellow/blue "Hybrid Mode" banner on each page, ALL AI buttons still visible (but items show review indicators), "Needs Review" / "Review Required" badges on AI-processed items, and AI/Human/Review badges on content items.

IN AI AUTONOMOUS MODE:

N/A — testing Hybrid specifically.

IN HYBRID MODE:

This IS the mode being tested.

IN HUMAN CONTROLLED MODE:

N/A — testing Hybrid specifically.

EXPECTED RESULT:

PASS if Hybrid banner visible on every page, AI buttons accessible, and review badges appear. PARTIAL if banner only shows on some pages. FAIL if no visual difference from AI Autonomous.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

9.3 — Human Controlled Mode — all pages

HOW IT WORKS:

Switch to Human Controlled mode. Visit every page. Verify: Blue "Manual Control" banner on each page, AI automation buttons HIDDEN (Find Prospects, Generate Leads, AI Build Funnel, Auto-Assign, Auto-Generate Monthly, Draft Contract, Scan for Updates, Auto-Update, Generate Morning Briefing), Manual alternatives shown ("Enter Prospects Manually"), and View/Read-only features still work (viewing invoices, documents, contracts).

IN AI AUTONOMOUS MODE:

N/A — testing Human specifically.

IN HYBRID MODE:

N/A — testing Human specifically.

IN HUMAN CONTROLLED MODE:

This IS the mode being tested.

EXPECTED RESULT:

PASS if Manual Control banner on every page, AI automation buttons hidden, manual alternatives available, and read-only features work. PARTIAL if some buttons not properly hidden. FAIL if no difference from other modes.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

9.4 — Per-Section Overrides work independently

HOW IT WORKS:

Go to Settings > AI Modes. Set Global to "Hybrid". Then override Outreach to "AI Autonomous" and Finance to "Human Controlled". Visit Outreach — should behave as AI Autonomous (no banner, all AI buttons). Visit Finance — should behave as Human Controlled (blue banner, AI buttons hidden). Visit CRM — should inherit Hybrid (yellow banner, review badges). Each section respects its override independently.

IN AI AUTONOMOUS MODE:

Override test — different modes per section.

IN HYBRID MODE:

Override test — global is Hybrid.

IN HUMAN CONTROLLED MODE:

Override test — Finance set to Human.

EXPECTED RESULT:

PASS if each section respects its override (Outreach = Auto, Finance = Human, CRM = Hybrid). PARTIAL if overrides partially work. FAIL if overrides have no effect.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

9.5 — Mode persists across navigation and refresh

HOW IT WORKS:

Switch to a mode (e.g., Human Controlled). Navigate between pages — mode should stay the same everywhere. Refresh the browser — mode should persist (stored via API, not just local state). The mode indicator in the sidebar should always show the current mode.

IN AI AUTONOMOUS MODE:

Test with any mode.

IN HYBRID MODE:

Test with any mode.

IN HUMAN CONTROLLED MODE:

Test with any mode.

EXPECTED RESULT:

PASS if mode persists when navigating between pages AND after a full page refresh. FAIL if mode resets on navigation or refresh.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

10. WALLET & BUDGET SYSTEM

The wallet system controls AI spending. In dummy/demo mode, the balance stays static (\$355.02). In production, each AI API call deducts from the wallet. Budget pools allocate spending across agent groups. Spending controls prevent overspending.

10.1 — Wallet visible and consistent everywhere

HOW IT WORKS:

The wallet balance should be visible in the sidebar on every page. The value should be consistent — same number on Dashboard, Outreach, CRM, etc. In Settings > Wallet, full breakdown available: balance, monthly spend, budget, pools, and controls.

IN AI AUTONOMOUS MODE:

Wallet visible. In production, balance depletes faster with all agents running.

IN HYBRID MODE:

Same display. Moderate depletion.

IN HUMAN CONTROLLED MODE:

Same display. Minimal depletion since AI runs less.

EXPECTED RESULT:

PASS if wallet shows same balance on every page AND Settings > Wallet has full breakdown with pools and controls. FAIL if wallet missing from any page or balance inconsistent.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

10.2 — Budget pools and spending controls work

HOW IT WORKS:

4 budget pools visible with progress bars: Standard (Agents 1-11), Premium (Agents 12-16, 25-28), Creative (Agents 17-24), System (Agents 29-32). Spending controls: Auto-pause toggle (switch), Low Balance Threshold (\$50 default), Max Charge Per Agent (\$5 default). Toggles should switch states when clicked. Input fields should accept new values.

IN AI AUTONOMOUS MODE:

All pools active and spending.

IN HYBRID MODE:

Moderate pool usage.

IN HUMAN CONTROLLED MODE:

Minimal pool usage.

EXPECTED RESULT:

PASS if 4 pools display with progress bars, agent assignments shown, and all 3 spending controls are interactive (toggles switch, inputs accept values). FAIL if pools or controls missing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

11. END-TO-END FLOW CHAINS

These tests verify that clicking through a complete business flow produces the right sequence of actions, toasts, and state changes. Every button should lead to a next action — no dead ends.

11.1 — Outreach full chain

HOW IT WORKS:

Start at Outreach > Prospect Finder. Click "Find Prospects" (toast: "AI Prospecting Complete"). Click "Save All to CRM" (toast: "Leads Saved"). Go to Strategy tab. Click "Draft Messages" (toast: "Messages Drafted"). Go to Compose tab. Click "Send" (toast: "Message Sent"). Go to Follow-ups tab. Click "Send Follow-up" (toast: "Follow-up Sent"). Go to Analytics tab — data should reflect activity.

IN AI AUTONOMOUS MODE:

Full chain works with AI processing each step.

IN HYBRID MODE:

Each step may show review indicators. You confirm at each stage.

IN HUMAN CONTROLLED MODE:

Manual alternatives used. Some AI buttons hidden.

EXPECTED RESULT:

PASS if every button in the chain produces a toast and advances the flow. No dead-end buttons (every button leads to a result). No "undefined" or blank in toasts. FAIL if any button does nothing.

YOUR STATUS (circle one): PASS / PARTIAL / FAIL / N/A

YOUR NOTES:

11.2 — CRM full chain

HOW IT WORKS:

Lead appears in CRM (from Outreach save). Lead scores (auto or manual). Click "Set Meeting" (toast). Go to Call Intelligence — pre-call briefing available. Upload transcript (toast: "Analysis Complete"). Go to Proposals — click "Create Proposal" (toast). Click "Send Proposal" (toast). Click "Mark Won" (toast + revenue recorded in Finance). "Start Onboarding" appears linking to Production.

IN AI AUTONOMOUS MODE:

Auto-scoring, auto-briefing, auto-follow-up.

IN HYBRID MODE:

Manual confirmation at each step.

IN HUMAN CONTROLLED MODE:

All manual with AI assistance on request.

EXPECTED RESULT:

PASS if complete chain from lead > score > meeting > call > proposal > won works with toasts at every step. "Mark Won" records revenue in Finance. FAIL if chain breaks at any point.

YOUR STATUS (circle one): PASS / PARTIAL / FAIL / N/A

YOUR NOTES:

11.3 — Production full chain

HOW IT WORKS:

Start from "Mark Won" in CRM or navigate to Production. Complete onboarding steps. Run marketing audit (toast). Create content (toast). Quality review assigns badges. "Approve & Publish" (toast). Generate leads for client (toast). Generate report (toast). Sync to client CRM (toast).

IN AI AUTONOMOUS MODE:

Auto-audit, auto-generate, auto-publish.

IN HYBRID MODE:

Manual approval at each step.

IN HUMAN CONTROLLED MODE:

All manual.

EXPECTED RESULT:

PASS if complete chain from onboarding > audit > create > review > publish > leads > report works. FAIL if chain breaks.

YOUR STATUS (circle one): PASS / PARTIAL / FAIL / N/A

YOUR NOTES:

11.4 — No dead-end buttons anywhere

HOW IT WORKS:

Every button in the entire application should lead to: a toast notification, a state change, a navigation, or a clear result. No button should do absolutely nothing when clicked. No toast should show "undefined", "null", or blank content. Every toast should have both a title and description.

IN AI AUTONOMOUS MODE:

All buttons functional.

IN HYBRID MODE:

All buttons functional.

IN HUMAN CONTROLLED MODE:

Some buttons hidden (correct behavior). Visible buttons all functional.

EXPECTED RESULT:

PASS if every visible button produces a result when clicked. No blank toasts, no "undefined" values, no silent failures. FAIL if any button does nothing when clicked.

YOUR STATUS (circle one): PASS / PARTIAL / FAIL / N/A

YOUR NOTES:

12. CONTENT & TERMINOLOGY STANDARDS

PMG Group serves exclusively cybersecurity/IT companies. All content must use industry terminology correctly, avoid banned marketing buzzwords, maintain consistent pricing, and use the correct sample client names.

12.1 — Forbidden words not present

HOW IT WORKS:

Scan all visible text across every page. The following words should NEVER appear in any static text, AI-generated content, toast messages, or descriptions: "leverage", "synergy", "cutting-edge", "game-changing", "innovative". These are banned marketing buzzwords that sound generic and unprofessional.

IN AI AUTONOMOUS MODE:

AI-generated content must also avoid these words (enforced in brand voice settings).

IN HYBRID MODE:

Same — all content checked.

IN HUMAN CONTROLLED MODE:

Same — all visible text checked.

EXPECTED RESULT:

PASS if none of the 5 forbidden words appear anywhere in the application. FAIL if any forbidden word is found.

YOUR STATUS (circle one): PASS / PARTIAL / FAIL / N/A

YOUR NOTES:

12.2 — Cybersecurity terminology used correctly

HOW IT WORKS:

The system should naturally use industry terms: NIST (National Institute of Standards and Technology), SOC 2 (compliance standard), SIEM (Security Information and Event Management), EDR (Endpoint Detection and Response), MDR (Managed Detection and Response), XDR (Extended Detection and Response). These should appear in relevant contexts like content strategy, prospect analysis, and marketing materials.

IN AI AUTONOMOUS MODE:

AI-generated content uses these terms naturally.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same — static content uses correct terminology.

EXPECTED RESULT:

PASS if cybersecurity terms are used correctly in context throughout the application. FAIL if terms are misused or absent where expected.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

12.3 — Pricing tiers and client names consistent

HOW IT WORKS:

Pricing tiers should be consistent everywhere they appear: Starter \$2,500/mo, Growth \$5,000/mo, Enterprise \$10,000/mo. Sample client names should be consistent: SecureNet Solutions, CyberShield IT, DataVault MSP, Fortress Cybersecurity, ShieldOps Inc. The core promise "20 ready-to-close deals in your first month" should be referenced in Production/Reporting sections.

IN AI AUTONOMOUS MODE:

Pricing in proposals, invoices, contracts should all match.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same.

EXPECTED RESULT:

PASS if pricing tiers match everywhere (proposals, invoices, contracts), sample client names are consistent, and "20 deals" promise is referenced. FAIL if pricing is inconsistent or promise is missing.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

13. ERROR HANDLING & EDGE CASES

The system runs in dummy/demo mode where AI endpoints return 403 errors. All mutation calls use onError fallback handlers with realistic hardcoded toast messages. The app should never crash, show blank pages, or display raw error messages to the user.

13.1 — AI call 403 handling

HOW IT WORKS:

Every AI action button (Find Prospects, Generate Leads, Create Content, etc.) makes an API call that returns 403 in demo mode. The onError handler should catch this and show a realistic toast message instead of crashing. Example: clicking "Find Prospects" returns 403 !' toast shows "AI Prospecting Complete — Found 10 prospects with 95% confidence" (hardcoded fallback).

IN AI AUTONOMOUS MODE:

All AI buttons trigger 403 > fallback toast. No crashes.

IN HYBRID MODE:

Same behavior.

IN HUMAN CONTROLLED MODE:

AI buttons hidden, so fewer 403 calls. Manual buttons work normally.

EXPECTED RESULT:

PASS if every AI button produces a realistic toast message (not an error message) when clicked. No red error toasts, no crashes, no blank screens. FAIL if any button causes a crash or shows raw error.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

13.2 — No console errors on page load

HOW IT WORKS:

Open browser developer tools (F12 > Console). Navigate to each page. The console should be clean — no red error messages. Warnings are acceptable (React DevTools suggestion, etc.) but no "Illegal constructor", "Invalid hook call", "Cannot read property of undefined", or import/module errors.

IN AI AUTONOMOUS MODE:

Clean console on all pages.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same.

EXPECTED RESULT:

PASS if console shows no red errors on any page. Common acceptable warnings: React DevTools suggestion, 401 on initial load (redirects to login). FAIL if any red errors appear in console.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

13.3 — Responsive design works

HOW IT WORKS:

Test at 3 viewport widths: Desktop (1280px+) — full sidebar, multi-column grids; Tablet (~768px) — sidebar collapses, grids reduce columns; Mobile (~375px) — hamburger menu, single column, no horizontal overflow. Dashboard KPI cards should reflow from 6-column to 2-column. Settings tabs should scroll on small screens.

IN AI AUTONOMOUS MODE:

Same responsive behavior in all modes.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same.

EXPECTED RESULT:

PASS if layout adapts properly at all 3 viewport sizes. No horizontal scrollbar on content areas. Cards and tabs reflow correctly. FAIL if layout breaks at any viewport size.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

13.4 — Visual design consistency

HOW IT WORKS:

Verify across all pages: Dark theme consistent (navy/dark background), Crimson accent color (#DC2626) on primary actions and CTAs, Gold accent for insights, Glass-card styling (border, backdrop blur) on all cards, Framer Motion animations on page transitions and element loads, No content overflow or clipping.

IN AI AUTONOMOUS MODE:

Same visual design in all modes.

IN HYBRID MODE:

Same.

IN HUMAN CONTROLLED MODE:

Same.

EXPECTED RESULT:

PASS if dark theme, crimson accents, glass styling, and animations are consistent across every page. No visual inconsistencies or broken layouts. FAIL if styling is inconsistent or broken.

YOUR STATUS (circle one): **PASS** / **PARTIAL** / **FAIL** / **N/A**

YOUR NOTES:

END OF CHECKLIST

SUMMARY

Total Sections: 14 (Login, Dashboard, Outreach, CRM, Marketing, Production, Admin, Finance, Settings, AI Modes, Wallet, E2E Chains, Content Standards, Error Handling)

Total Test Items: 75+ detailed items with full mode-aware descriptions

AI Modes Tested: AI Autonomous, Hybrid, Human Controlled

Agents Covered: All 32 agents across 6 operational sections

Document generated for PMG Group LLC team testing.
